Award Winning Design

The DTS5800 is the Winner of the prestigious International IF Design Award 2007

DTS5800

For Wallpaper Removal & Steam Cleaning

Product Specifications:

The new Wagner DTS5800 Steamer ensures that you will get rid of your old wallpaper or complete your steam cleaning tasks faster than using any other unit on the market. The key is the award winning dual chamber system that allows the unit to heat in only 3 minutes, ready for use. No longer will you need to wait long periods of time for the unit to reach steaming, you simply turn the DTS5800 on and wait 3 minutes and away you go.

Why does the DTS5800 heat quicker than any other unit?

The dual tank system has been designed so that the smaller chamber heats up quickly and creates steam ready for use. While you are working, the larger chamber is continuously passing water into the smaller chamber so that you have a constant supply of vapour steam. With 120 minutes of constant steam time, you will never go back to conventional cleaning again.

Technical Data:

Power rating:	2000 W
Steaming time max.	120 min.
Steaming power:	50 g/min.
Reservoir capacity:	5.8 litres
Hose length:	3.5 metres
Weight steamer plate:	300 grams

Order Information:

- Part No: 0419003
- Barcode: 4004025056833
- Master Pack Qty: 1

RRP \$199.00

New Dual Tank Technology

Water is poured into the opening (5) to the tank (1). Through a valve (2) the water flows continuously into the heating chamber (3). Here the water will be quickly heated and produces a certain quantity of steam. The steam rises (4) and comes out of the hose opening (5). The isolation plate (6) lies on the water surface and ensures that the steam does not condense in the upper area. The safety valve (7) is for additional safety.
